Oracle VM VirtualBox Installation and Linux Setup

Step 1: Download VirtualBox

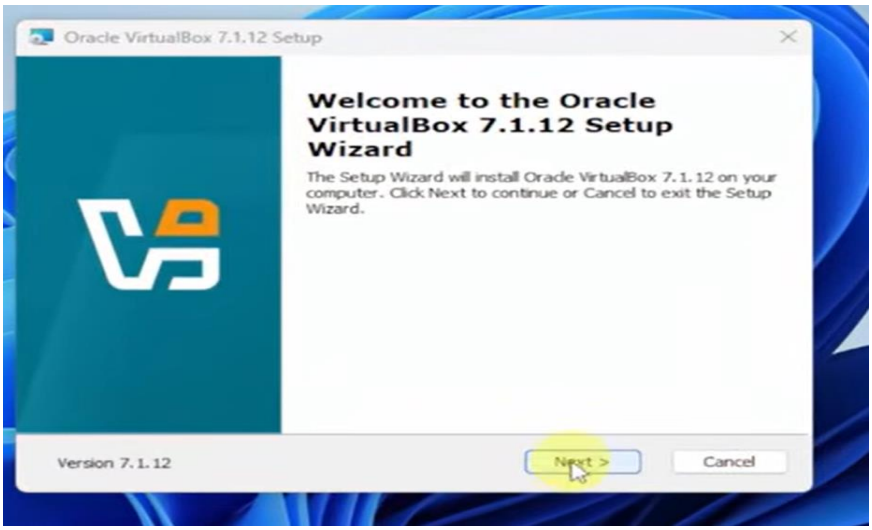

1. Open a web browser.
2. Go to the official VirtualBox website.
3. Download the **Windows installer**.
4. Save the installer on your computer.

VirtualBox download page.

Step 2: Install VirtualBox

1. Open the downloaded VirtualBox installer.
2. The setup wizard will appear.
3. Click **Next**.
4. Keep the default installation location.
5. Click **Next**.

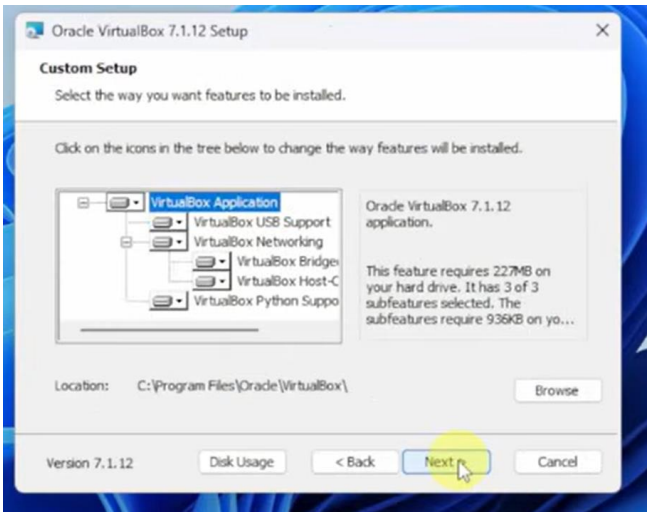

Step 3: Select Installation Options

Keep the default options selected:

- VirtualBox Application
- Start Menu Entries
- Shortcuts
- File Associations

Click **Next**.

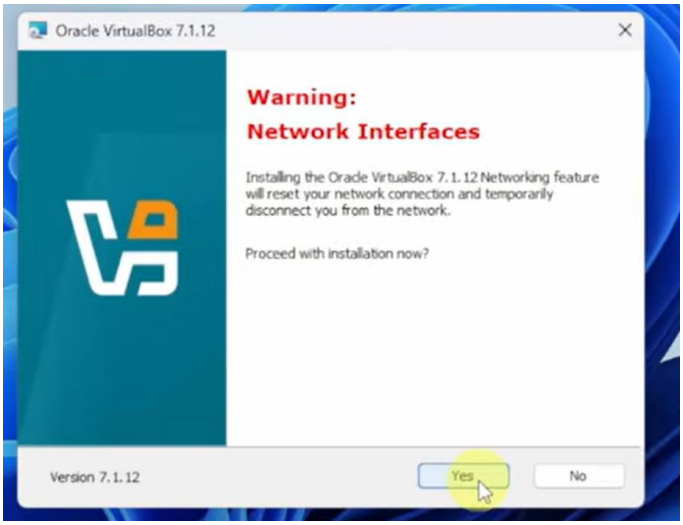

Step 4: Network Warning

During installation, VirtualBox may display a warning that the network connection may be temporarily reset.

Click **Yes** to continue.

Then click **Install**.

Step 5: Complete Installation

Wait for the installation to finish.

Click **Finish**.

Oracle VM VirtualBox is now installed.

Download Ubuntu Linux

Step 6: Download Ubuntu ISO

1. Go to the official Ubuntu website.
2. Download the **Ubuntu Desktop ISO**.
3. Save the .iso file on your computer.

Create a Linux Virtual Machine

Step 7: Open VirtualBox

Open **Oracle VM VirtualBox**.

Click:

New

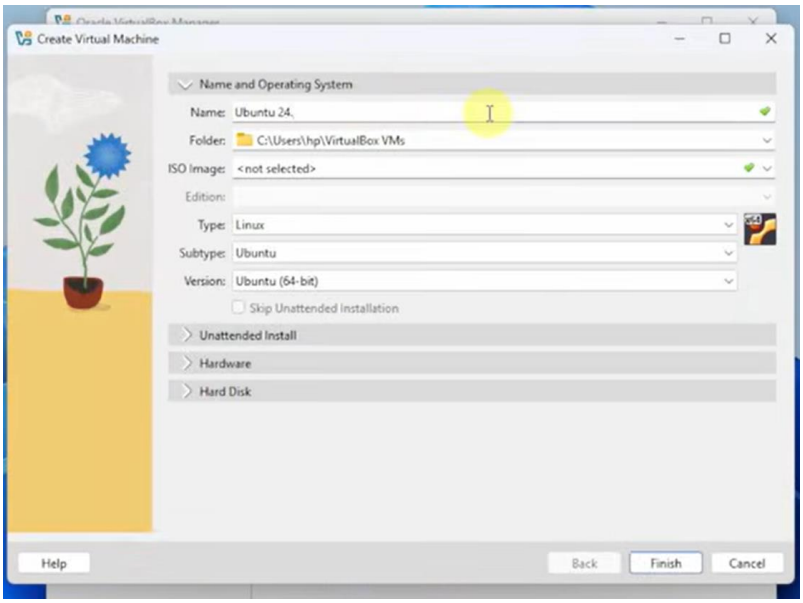

Step 8: Configure the Virtual Machine

Enter:

Setting	**Value**
Name	Ubuntu
Type	Linux
Version	Ubuntu (64-bit)
RAM	5196 MB
CPU	4 cores
Disk	25 GB or more

Click **Next**.

Step 9: Create Virtual Hard Disk

Select:

Create a Virtual Hard Disk Now

Click **Create**.

Select:

VDI (VirtualBox Disk Image)

Click **Next**.

Select:

Dynamically Allocated

Click **Next**.

Set the disk size, for example:

25 GB

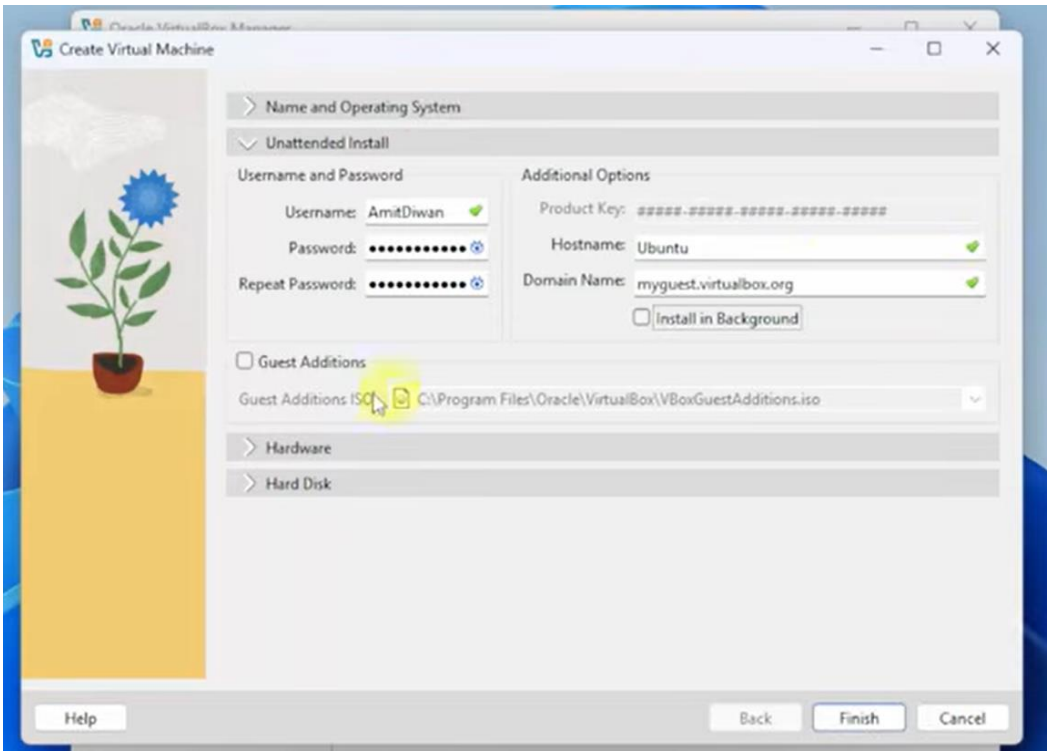

Click **Create**.

Create User Account

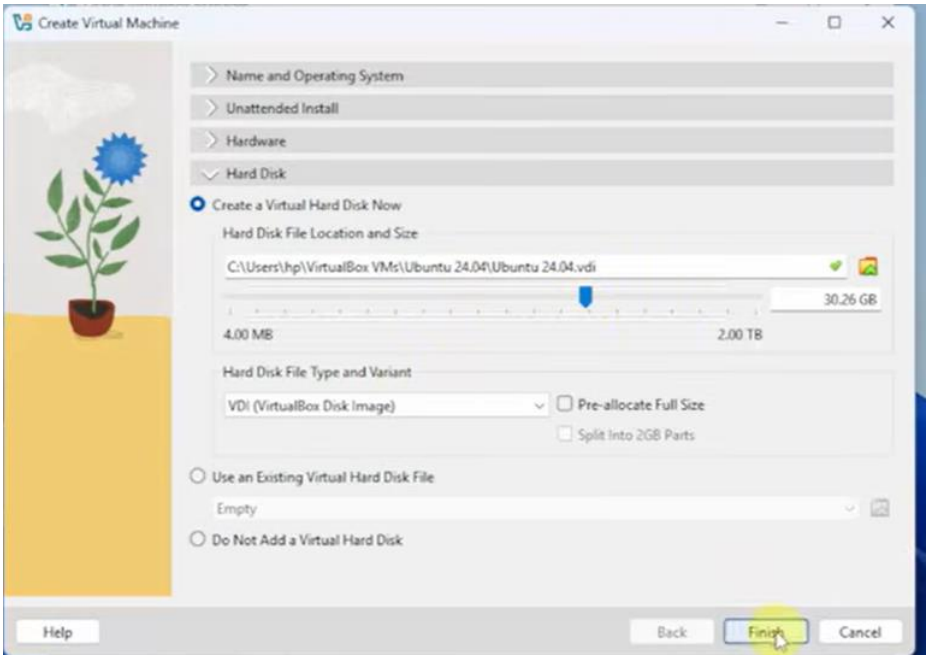

Enter your details:

Field	Example
Name	Student

Username	student
Password	Your password

Attach Ubuntu ISO

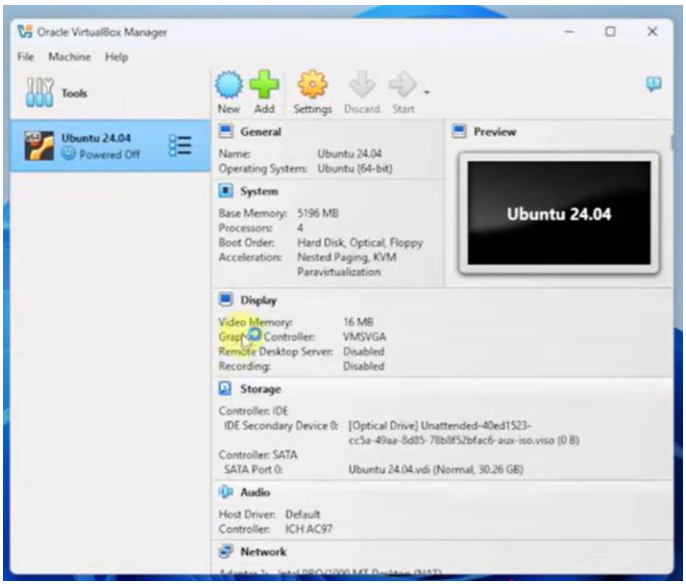

Step 10: Open VM Settings

Select the newly created **Ubuntu** VM.

Click:

Settings → Storage

Step 11: Attach ISO

1. Select the optical drive under **Controller: IDE/SATA**.
2. Click the disk icon.
3. Select **Choose a Disk File**.
4. Select the downloaded Ubuntu .iso file.
5. Click **OK**.

The Ubuntu ISO is now attached to the virtual machine.

Install Linux

Step 12: Start the Virtual Machine

Select the Ubuntu VM.

Click:

Start

The Ubuntu installer will boot.

Step 13: Select Ubuntu Installation

Choose:

Try or Install Ubuntu

Wait for Ubuntu to load.

Then select:

Install Ubuntu

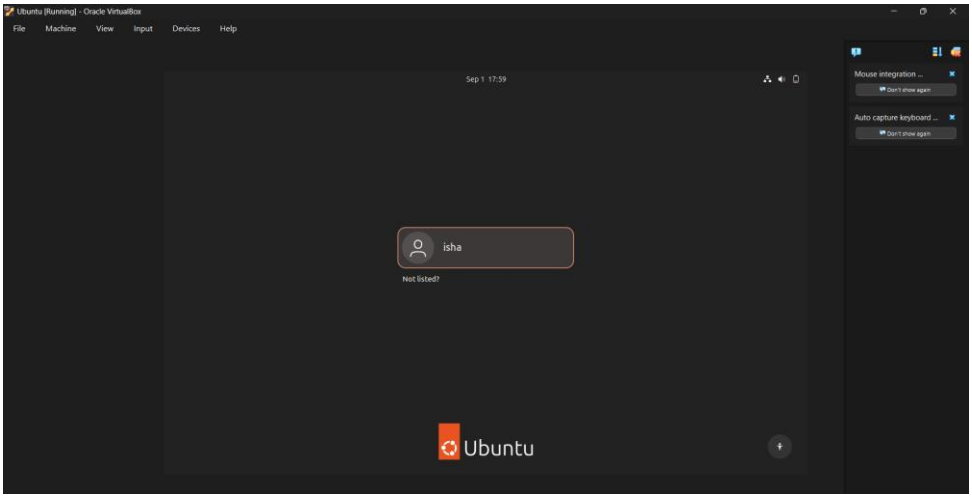

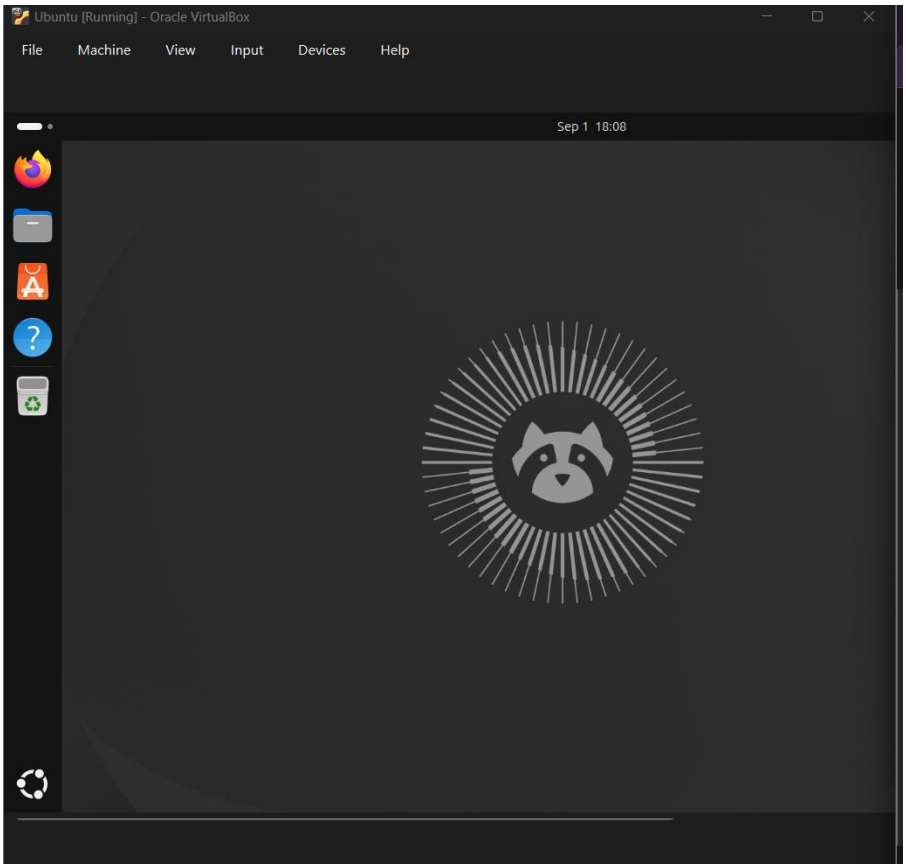

First Linux Setup

Step 14: Login

Enter the username and password created during installation.

You should now see the Ubuntu desktop.
